

Mapping of New Health Emergency Programme to Programme Budget 2016-17 Results

2016-17 Results Framework	New Results Code
Outcome 5.1. All obligations under the International Health Regulations (2005) met	
Output 5.1.1. Implementation and monitoring of the International Health Regulations (2005) at country level and training and advice for Member States in further developing and making use of core capacities required under the Regulations	
Country Office Deliverable	
<ul style="list-style-type: none"> • 511C1 - Support further development and implementation of the national plan for implementation of the International Health Regulations (2005) in countries and continue to support them in maintaining their capacities throughout the biennium 	E.2.2.
<ul style="list-style-type: none"> • 511C2 - Facilitate national dialogue across different disciplines, in particular on animal health, laboratory, food, chemical and radio-nuclear safety and points of entry 	E.2.2.
<ul style="list-style-type: none"> • 511C3 - Coordinate with national International Health Regulations (2005) focal point to review, analyse and use national information, and ensure adequate reporting on implementation of the Regulations 	E.2.1.
Regional Office Deliverable	
<ul style="list-style-type: none"> • 511R1 - Monitor implementation of the Regulations in the region and pursue strategies to support related capacity strengthening at country level 	E.2.1.
<ul style="list-style-type: none"> • 511R2 - Develop and/or adapt regional and subregional tools, guidelines and training materials 	E.2.2.
<ul style="list-style-type: none"> • 511R3 - Develop guidelines to advocate for, raise awareness of, and increase political commitment to, the core capacity requirements in the Regulations 	E.2.2.
Headquarters Deliverable	
<ul style="list-style-type: none"> • 511H1 - Formulate policies, norms, standards and guidelines for the development of specific capacities 	E.2.2.
<ul style="list-style-type: none"> • 511H2 - Provide advocacy on global health matters related to core capacity requirements in the Regulations, and convene meetings of international technical partners to facilitate global dialogue across different sectors and disciplines on issues related to animal health, food, chemical and radio-nuclear safety, and points of entry 	E.2.1.
<ul style="list-style-type: none"> • 511H3 - Coordinate a global monitoring process, using outcome, performance and reporting indicators, and publish a global report on the implementation status of the International Health Regulations (2005) 	E.2.3.
Output 5.1.2. Standing capacity to provide evidence-based and timely policy guidance, risk assessment, information management, response and communications for all acute public health emergencies of potential international concern	
Country Office Deliverable	
<ul style="list-style-type: none"> • 512C1 - Use a common WHO event-based surveillance and risk assessment system and procedures for all identified public health events of international concern 	E.3.1.
<ul style="list-style-type: none"> • 512C2 - Develop and maintain WHO capacities or ensure mechanisms are in place for adequate information management, risk assessment and risk communication for public health events of potential international concern 	E.3.1.
<ul style="list-style-type: none"> • 512C3 - Identify national institutions that can join the Global Outbreak Alert and Response Network and facilitate opportunities for those that already belong to the Network to contribute to alert and response for public health events of international concern 	E.4.2.

2016-17 Results Framework	New Results Code
Regional Office Deliverable	
<ul style="list-style-type: none"> 512R1 - Contribute to further development of a common WHO event-based surveillance and risk assessment system with common procedures for all identified public health events of international concern, and encourage its use 	E.3.1.
<ul style="list-style-type: none"> 512R2 - Ensure mechanisms are in place for adequate information management, risk assessment, crisis communication, logistics, stockpiles and surge capacity for events of potential international concern 	E.3.1.
<ul style="list-style-type: none"> 512R3 - Coordinate international response and provide surge capacity to countries during public health events of international concern 	E.4.1.
<ul style="list-style-type: none"> 512R4 - Support further development of the Global Outbreak Alert and Response Network, including adaptation to regional specificities in order to improve response to public health events of international concern 	E.4.2.
Headquarters Deliverable	
<ul style="list-style-type: none"> 512H1 - Maintain and further develop a common WHO event-based surveillance and risk assessment system with common procedures for all identified public health events of international concern 	E.3.1.
<ul style="list-style-type: none"> 512H2 - Support regional offices in ensuring that capacities are in place, or a mechanism identified, for coordinating the international response and providing surge capacity to countries for public health events of international concern 	E.4.1.
<ul style="list-style-type: none"> 512H3 - Maintain the secretariat of the Global Outbreak Alert and Response Network and ensure its further development, including ability to manage meetings of the Network's Steering Committee, in order to facilitate deployment of experts for public health events of international concern 	E.4.2.
Outcome 5.2. Increased country capacity to build resilience and adequate preparedness for mounting a rapid, predictable and effective response to major epidemics and pandemics	
Output 5.2.1. Technical assistance to Member States to strengthen preparedness and response capacities for epidemic and pandemic threats, with a specific focus on implementing the Pandemic Influenza Preparedness Framework	
Country Office Deliverable	
<ul style="list-style-type: none"> 521C1 - Support countries in implementing and monitoring the Pandemic Influenza Preparedness Framework 	E.1.3.
<ul style="list-style-type: none"> 521C2 - Engage countries in implementing national preparedness, prevention and control plans for influenza, in accordance with regional and global policies and strategies 	E.1.1.
Regional Office Deliverable	
<ul style="list-style-type: none"> 521R1 - Implement the Pandemic Influenza Preparedness Framework by coordinating regional and subregional activities 	E.1.3.
<ul style="list-style-type: none"> 521R2 - Contribute to global influenza strategies by adapting guidance to regional contexts and support country offices in developing pandemic plans 	E.1.1.
<ul style="list-style-type: none"> 521R3 - Develop integrated regional influenza surveillance systems and aggregate, analyse and share information in order to monitor influenza activity 	E.1.1.

2016-17 Results Framework	New Results Code
Headquarters Deliverable	
<ul style="list-style-type: none"> 521H1 - Coordinate and monitor global implementation of the Pandemic Influenza Preparedness Framework 	E.3.1.
<ul style="list-style-type: none"> 521H2 - Develop standards, tools, information technology platforms and methodologies for influenza surveillance, risk assessment and risk management 	E.1.1.
Output 5.2.2. Standing capacity to provide expert guidance and lead global networks and systems to anticipate, prevent and control epidemic and pandemic diseases	
Country Office Deliverable	
<ul style="list-style-type: none"> 522C1 - Support countries in implementing projects, norms and standards in order to anticipate, prevent and control outbreaks of epidemic diseases 	E.1.1.
<ul style="list-style-type: none"> 522C2 - Support countries in developing or strengthening surveillance systems for priority epidemic diseases 	E.1.1.
Regional Office Deliverable	
<ul style="list-style-type: none"> 522R1 - Support the development and implementation of regional strategies on priority epidemic diseases 	E.1.1.
<ul style="list-style-type: none"> 522R2 - Support country offices in implementing best practices for the prevention and control of epidemic threats, including risk assessment, vaccine and treatment recommendations 	E.1.1.
<ul style="list-style-type: none"> 522R3 - Provide technical support for the development and operation of surveillance systems for priority epidemic diseases 	E.1.1.
Headquarters Deliverable	
<ul style="list-style-type: none"> 522H1 - Lead in the development of global strategies, policies, norms, standards and guidance for epidemic diseases, as well as research agendas and innovation related to prevention and response 	E.1.2.
<ul style="list-style-type: none"> 522H2 - Develop and coordinate mechanisms for ensuring access to life-saving interventions, including managing global stockpiles and technical expert networks for preparedness and response 	E.1.1.
<ul style="list-style-type: none"> 522H3 - Monitor global trends and risk analyses of epidemic diseases and lead in establishing standards to strengthen surveillance of epidemic diseases 	E.1.1.
<ul style="list-style-type: none"> 522H4 - Support epidemic containment, in particular, improved clinical management and infection prevention and control, through expert networks 	E.1.2.
Output 5.2.3. Implementation oversight of the draft global action plan on antimicrobial resistance, including surveillance and development of national and regional plans	
<ul style="list-style-type: none"> 523C1 - Advocate for antimicrobial resistance as a national health priority 	n/a
<ul style="list-style-type: none"> 523C2 - Support national action against antimicrobial resistance, including development of plans and surveillance systems 	n/a
Regional Office Deliverable	
<ul style="list-style-type: none"> 523R1 - Support and coordinate the effective engagement of countries in regional and global action plans on antimicrobial resistance 	n/a
<ul style="list-style-type: none"> 523R2 - Support country offices in developing national plans for antimicrobial resistance 	n/a

2016-17 Results Framework	New Results Code
<ul style="list-style-type: none"> 523R3 - Monitor the regional situation and trends through aggregation, validation, analysis, dissemination and use of data on antimicrobial resistance 	n/a
Headquarters Deliverable	
<ul style="list-style-type: none"> 523H1 - Lead in the development, monitoring and implementation of the draft global action plan on antimicrobial resistance and convene meetings and working groups with key stakeholders 	n/a
<ul style="list-style-type: none"> 523H2 - Develop surveillance standards and monitor the global antimicrobial resistance situation and trends 	n/a
<ul style="list-style-type: none"> 523H3 - Support regional and country offices in the development and implementation of national and regional plans on antimicrobial resistance 	n/a
Outcome 5.3. Countries with the capacity to manage public health risks associated with emergencies	
Output 5.3.1. Technical assistance to Member States for the development and maintenance of core capacities to manage risks to health associated with disasters and conflicts using an all-hazards approach	
Country Office Deliverable	
<ul style="list-style-type: none"> 531C1 - Provide technical assistance for emergency and disaster risk management for health in order to build national capacities, including for emergency preparedness, health sector response plans, and safer hospitals 	E.2.2.
<ul style="list-style-type: none"> 531C2 - Advocate and provide leadership and technical support for the integration of emergency and disaster risk management for health in national programmes and plans, and in country cooperation strategies, including for health system strengthening 	E.2.2.
<ul style="list-style-type: none"> 531C3 - Track the status of national capacities for emergency and disaster risk management for health, using appropriate tools 	E.2.2.
Regional Office Deliverable	
<ul style="list-style-type: none"> 531R1 - Advocate for the positioning of health within national emergency and disaster risk management programmes 	E.2.2.
<ul style="list-style-type: none"> 531R2 - Provide back-up technical assistance for emergency and disaster risk management for health, including preparedness and safer hospitals, to country offices, or direct to countries without country offices, across the region 	E.2.2.
<ul style="list-style-type: none"> 531R3 - Provide back-up support to country offices, or direct to countries without country offices, to track the status of national capacities in providing policy advice and technical assistance for the management of health-sector emergencies and disaster risk 	E.2.2.
Headquarters Deliverable	
<ul style="list-style-type: none"> 531H1 - Advocate for health in global emergency and disaster risk management discussions and decisions; harmonize global and WHO approaches 	E.2.2.
<ul style="list-style-type: none"> 531H2 - Provide policy advice, and develop guidance and tools for the implementation of emergency and disaster risk management, including for preparedness and safer hospitals 	E.2.2.
<ul style="list-style-type: none"> 531H3 - Maintain tool for tracking the status of national capacities for emergency and disaster risk management for health, and produce the global report 	E.2.2.

Output 5.3.2. Standing capacity to respond to natural disasters and conflict, and to lead networks and systems for effective humanitarian action	
Country Office Deliverable	
<ul style="list-style-type: none"> • 532C1 - Achieve minimum level of readiness in country offices for full implementation of the Emergency Response Framework in accordance with WHO’s readiness checklist 	E.4.3.
Regional Office Deliverable	
<ul style="list-style-type: none"> • 532R1 - Achieve minimum level of readiness in regional offices for full implementation of the Emergency Response Framework in accordance with WHO’s readiness checklist • 532R2 - Support the institutionalization of WHO’s readiness checklist and the Emergency Response Framework, and provide technical assistance to strengthen country office readiness for full implementation of the Framework; provide back-up technical assistance to country offices • 532R3 - Contribute to building global system-wide capacities for effective humanitarian action 	E.4.3. E.4.3. E.4.2.
Headquarters Deliverable	
<ul style="list-style-type: none"> • 532H1 - Achieve minimum readiness level in headquarters for full implementation of the Emergency Response Framework in accordance with WHO’s readiness checklist • 532H2 - Oversee the institutionalization of WHO’s readiness checklist and the Emergency Response Framework; develop and maintain relevant organizational policies, procedures, tools and capacities; provide back-up technical assistance to regional and country offices • 532H3 - Build global system-wide capacities and partnerships for effective humanitarian action, including through the Global Health Cluster • 532H4 - Establish and implement an Organization-wide surge mechanism for rapid deployment of qualified staff and partners to emergency settings 	E.4.3. E.4.3. E.4.2. E.4.2.

Output 5.3.3. Health-sector leadership and coordination for needs-based programme planning, monitoring and reporting in countries with protracted humanitarian emergencies, or those in recovery or transition.	
Country Office Deliverable	
<ul style="list-style-type: none"> • 533C1 - Provide technical and operational assistance to ensure that countries are able to fulfil the core Health Cluster/health sector functions, in accordance with the Inter-Agency Standing Committee Reference Model for Cluster Coordination, in support of partners and Member States • 533C2 - Achieve WHO’s minimum performance standards in countries with protracted humanitarian emergencies or which are in recovery or transition • 533C3 - Provide technical assistance to Member States and partners for improving the quality and coverage of health service delivery 	E.4.2. E.4.1. E.4.1.
Regional Office Deliverable	
<ul style="list-style-type: none"> • 533R1 - Provide back-up technical assistance to country offices to ensure that core Health Cluster/health sector functions are fulfilled, in accordance with the Inter-Agency Standing Committee Reference Model for Cluster Coordination, in support of Member States 	E.4.2.

2016-17 Results Framework	New Results Code
<ul style="list-style-type: none"> 533R2 - Provide back-up technical assistance to country offices to ensure that WHO's minimum performance standards are met in countries with protracted humanitarian emergencies, or which are in recovery or transition 	E.4.1.
<ul style="list-style-type: none"> 533R3 - Evaluate health service coverage and/or utilization, and WHO's performance in protracted emergency, transition or recovery settings; document lessons learnt and identify best practices 	E.4.1.
<ul style="list-style-type: none"> 533R4 - Ensure that WHO's work in providing health sector leadership and coordination in countries with protracted humanitarian emergencies, or which are in recovery or transition (output 533), is integrated in the country cooperation strategies of countries with protracted emergencies 	E.4.1.
Headquarters Deliverable	
<ul style="list-style-type: none"> 533H1 - Harmonize WHO's approach to protracted emergency, transition and recovery settings through the development of policy options, standards, guidance, tools and training curricula 	E.4.2.
<ul style="list-style-type: none"> 533H2 - Provide additional coordinated back-up support to country offices through global networks, including through the Global Health Cluster 	E.4.2.
