Everyone has a ROLE TO PLAY

You can help prevent antibiotic resistance

Preventing infection can reduce the use of antibiotics, and limit the spread of antibiotic resistance. Good basic hygiene is one of the most effective ways to reduce the risk of infection.

You can reduce the risk of infection by:

- washing your hands properly
- preparing food hygienically
- limiting close contact with others when you are sick
- practicing safer sex
- keeping your vaccinations up-to-date
- and, standing up for your right to safe water and sanitation

You can also reduce the spread of antibiotic resistance by:

- not sharing antibiotics with others
- and, always following the advice of a qualified health care professional when taking antibiotics
