

# NEPAL

Estimated number of people needing antiretroviral therapy (0-49 years), 2005:  
Antiretroviral therapy target declared by country:

## 1. Demographic and socioeconomic data

## 2. HIV indicators

	Date	Estimate	Source
Total population (millions)			
Population in urban areas (%)	2005	15.847	United Nations
Life expectancy at birth (years)	2003	61	WHO
Gross domestic product per capita (US\$)			
Government budget spent on health care (%)			
Per capita expenditure on health (US\$)			
Human Development Index	2003	0.526	UNDP

	Date	Estimate	Source
Adult prevalence of HIV/AIDS (15-49 years)			
Estimated number of people living with HIV/AIDS (0-49 years)			
Reported number of people receiving antiretroviral therapy (0-49 years), 2005	Dec 2004	75	WHO/UNAIDS
Estimated number of people needing antiretroviral therapy (0-49 years), 2005			
HIV testing and counselling sites: number of sites			
HIV testing and counselling sites: number of people tested at all sites			
Knowledge of HIV prevention methods (15-24 years)% - female <sup>°</sup>			
Knowledge of HIV prevention methods (15-24 years)% - male <sup>°</sup>			
Reported condom use at last higher risk sex (15-24 years)% - female <sup>°*</sup>			
Reported condom use at last higher risk sex (15-24 years)% - male <sup>°*</sup>			

<sup>°</sup> = Percentage of young people 15-24 years who correctly identify two major ways of preventing the sexual transmission of HIV (using condoms and limiting sex to one faithful, uninfected partner), who reject the two most common local misconceptions about HIV transmission, and who know that a healthy looking person can transmit HIV.

<sup>°\*</sup> = Percentage of young people 15-24 years reporting the use of a condom during sex with a non-regular partner in the last 12 months.
