WHO staff working in different countries.

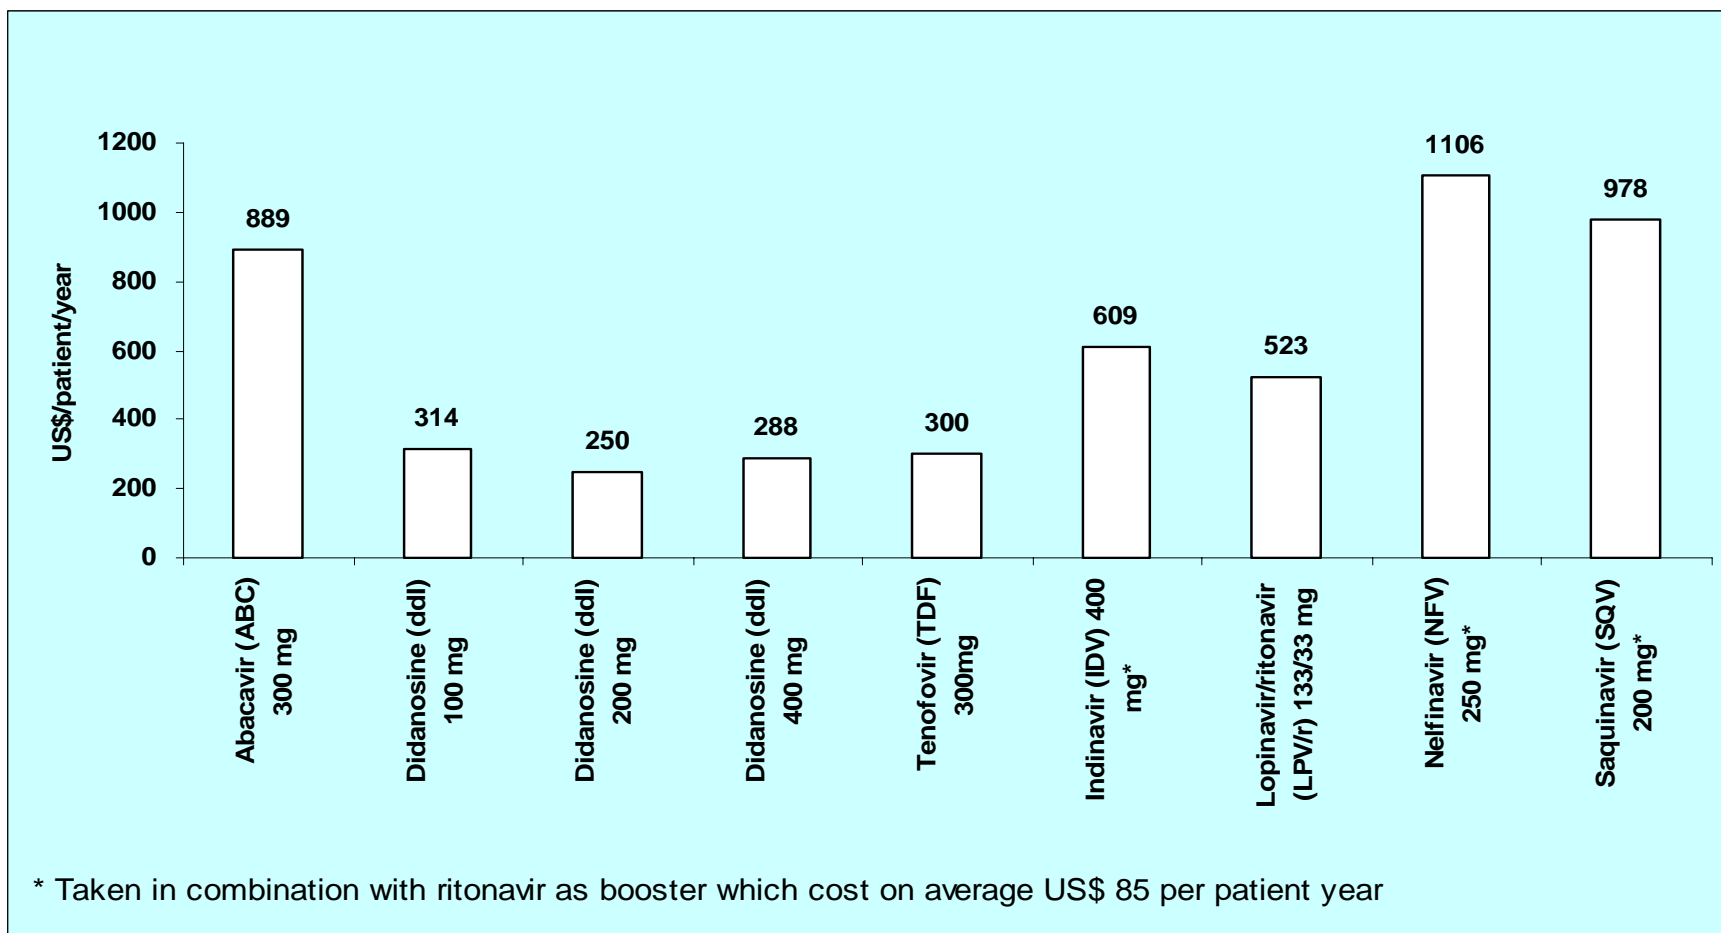

Weighted average price paid by low income countries for selected 1st line ARV formulations in 2005

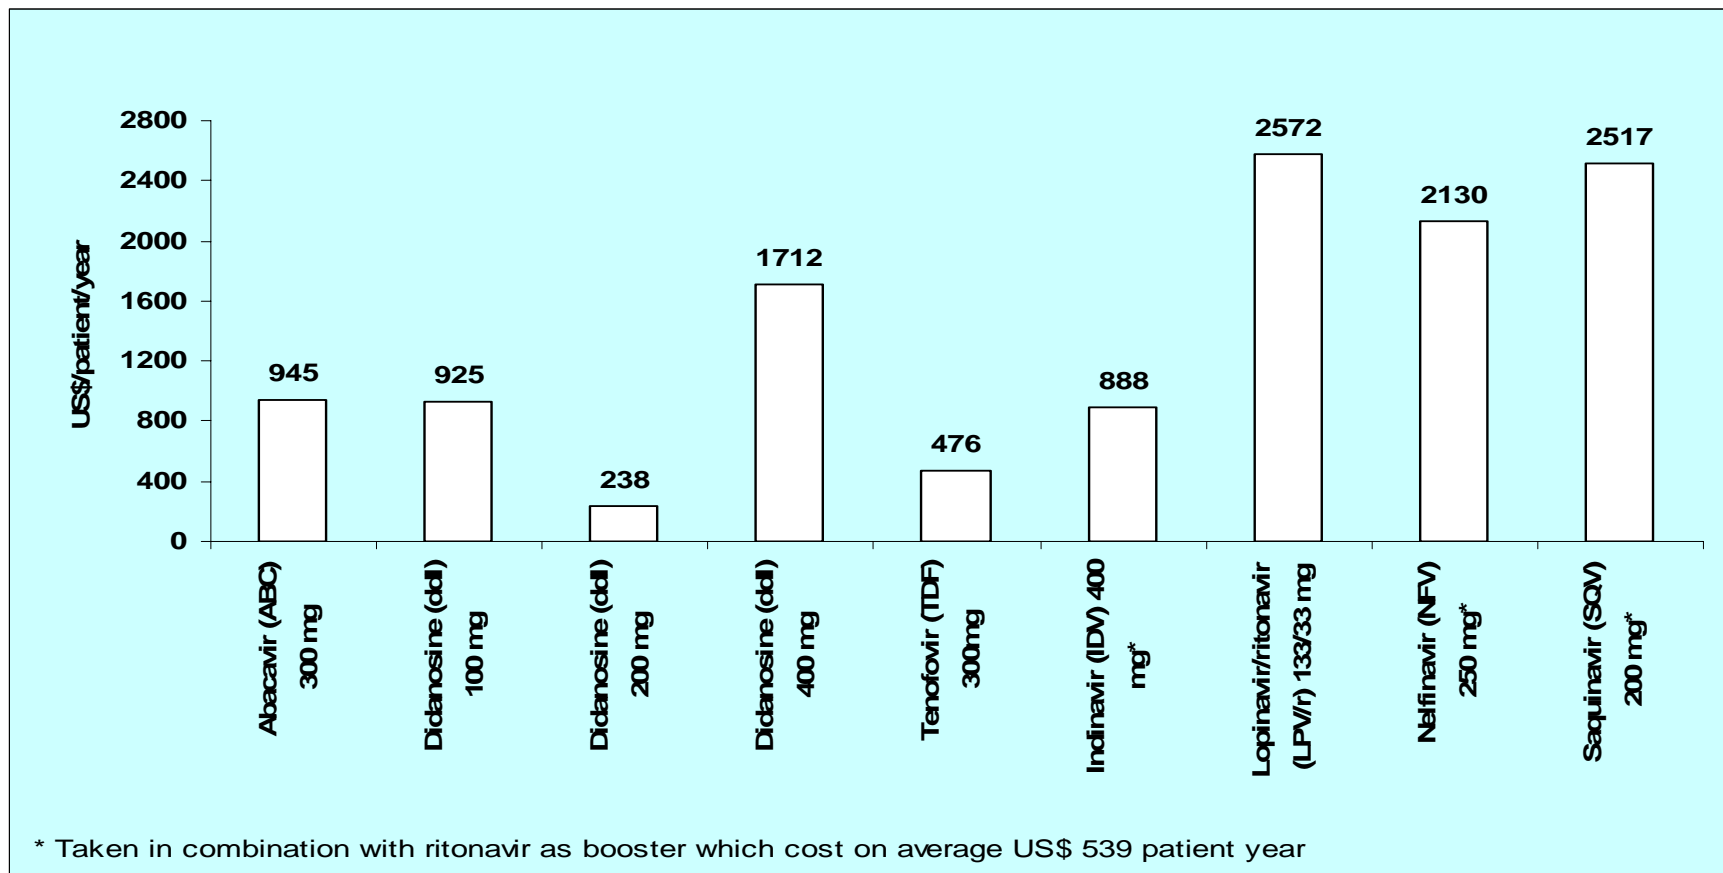

Weighted average price paid by middle income countries for selected 1st line ARV formulations in 2005

Weighted average price paid by low income countries for selected 2nd line ARV formulations in 2005

Weighted average price paid by middle income countries for selected 2nd line ARV formulations in 2005

Weighted average price paid for d4T/3TC/NVP 40/150/200 mg in 2005

Weighted average price paid for lamivudine (3TC) 150 mg 2005

Weighted average price paid for stavudine 40 mg in 2005

Weighted average price paid for d4T/3TC/NVP 30/150/200 mg in 2005

Weighted average price paid for zidovudine 100 mg in 2005

This finding can be explained by the fact that low income countries bought this formulation in small quantities (high transactional costs) while middle income countries procured in bigger quantities with low transactional costs.

Weighted average price paid for efavirenz (EFV) 50 mg in 2005

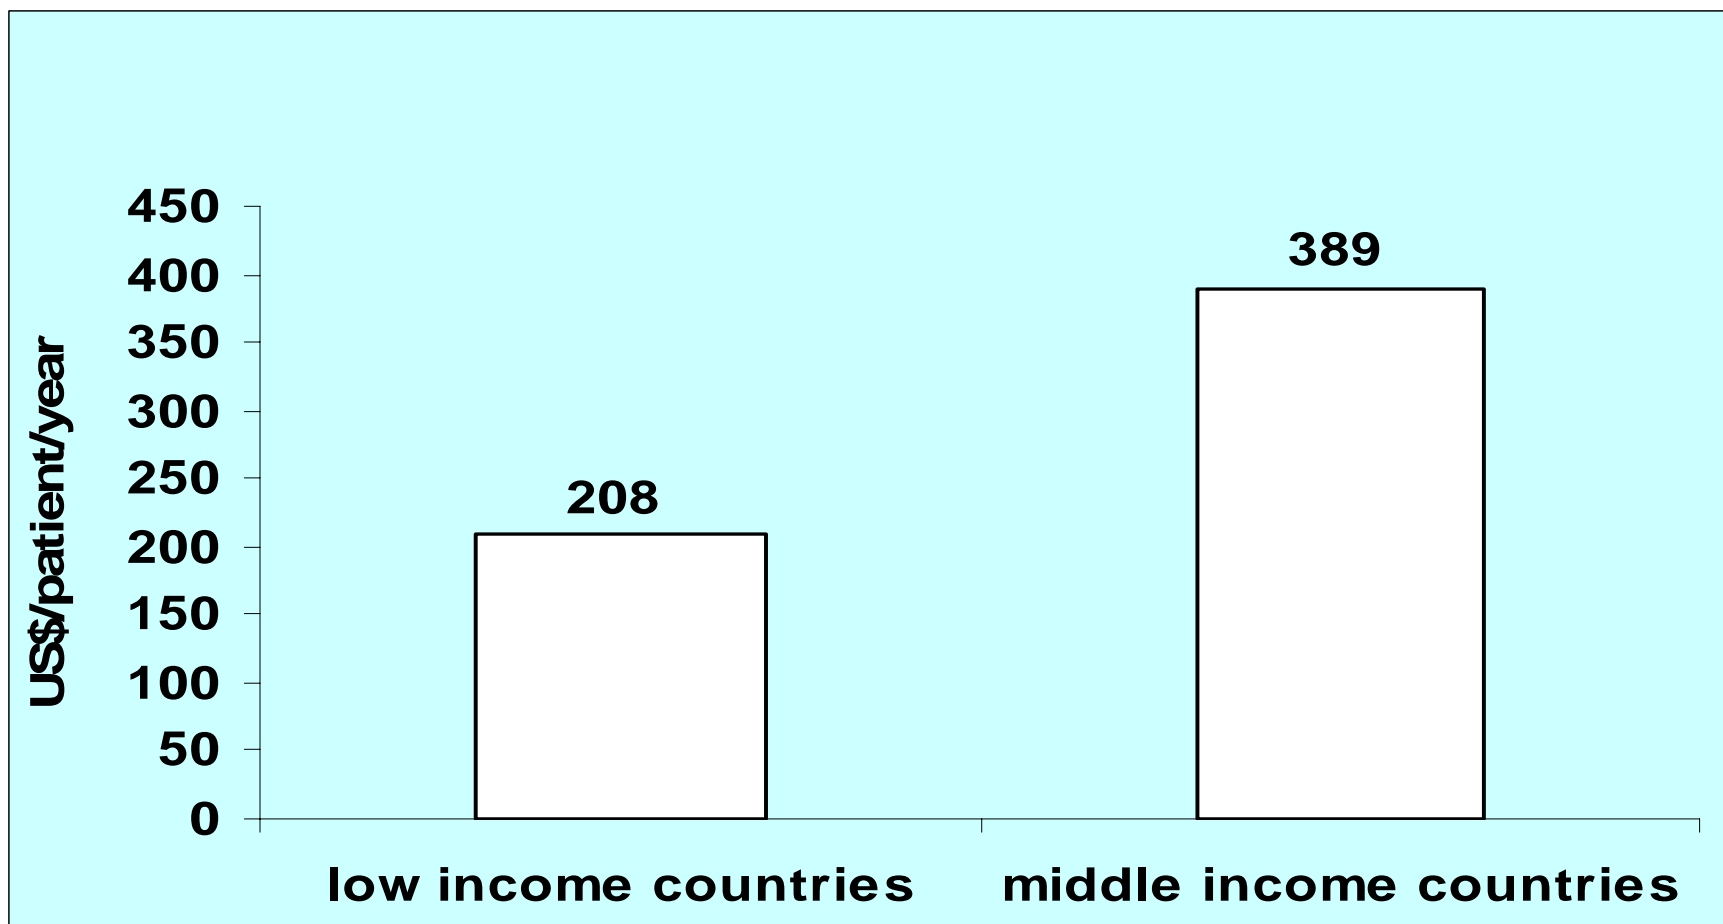

Weighted average price paid for stavudine (d4T) 30 mg in 2005

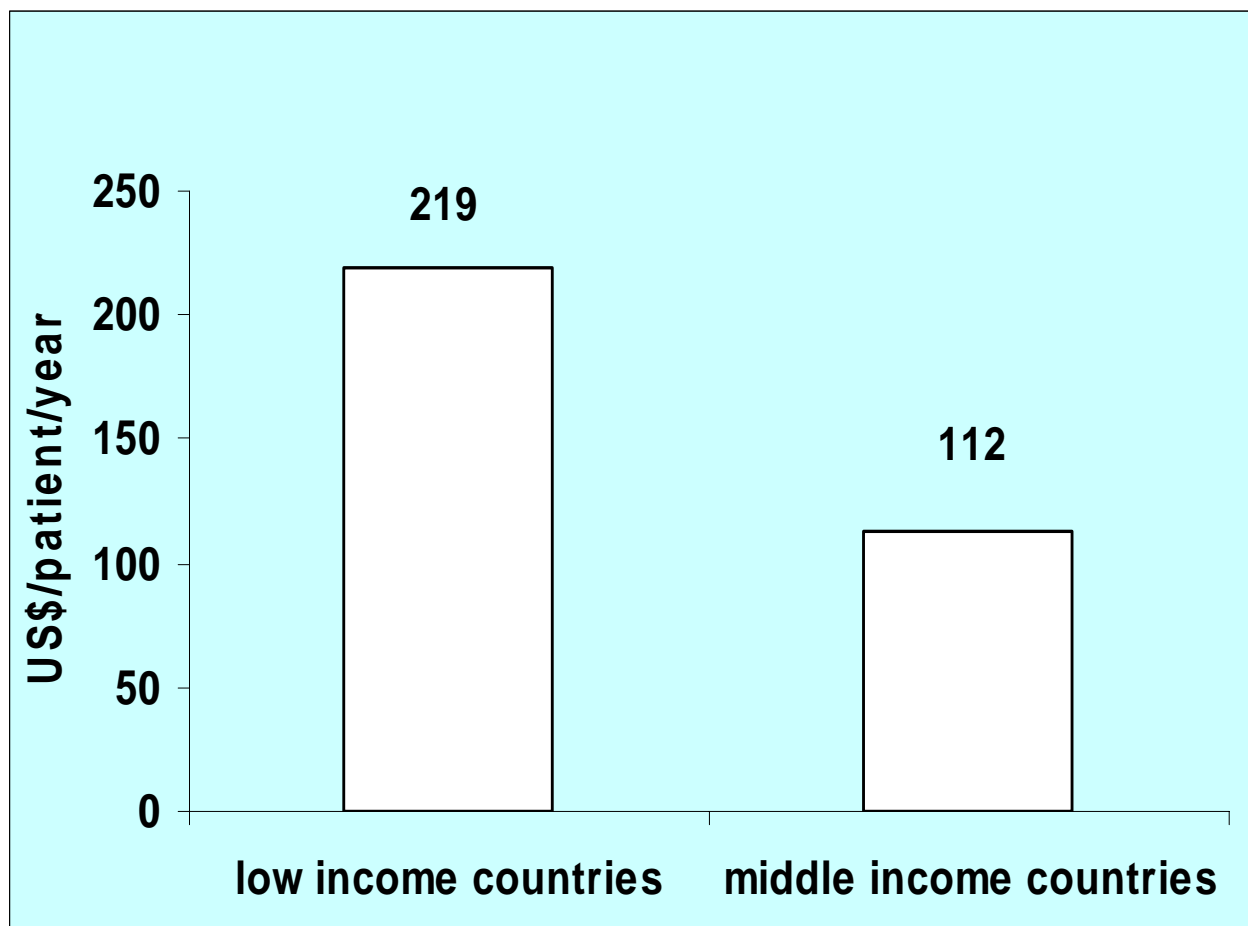

Weighted average price paid for efavirenz (EFV) 200 mg in 2005

Weighted average price paid for ZDV/3TC 300/150mg in 2005

Weighted average price paid for nevirapine (NVP) 200 mg in 2005

This finding can be explained by the fact that low income countries heavily procured from Boehringer Ingelheim while middle income countries opted for cheaper generic version.

Weighted average price paid for zidovudine (ZDV) 300 mg in 2005

Weighted average price paid for efavirenz (EFV) 600 mg in 2005

Weighted average price paid for didanosine 400 mg in 2005

Weighted average price paid for nelfinavir (NFV) 250 mg in 2005

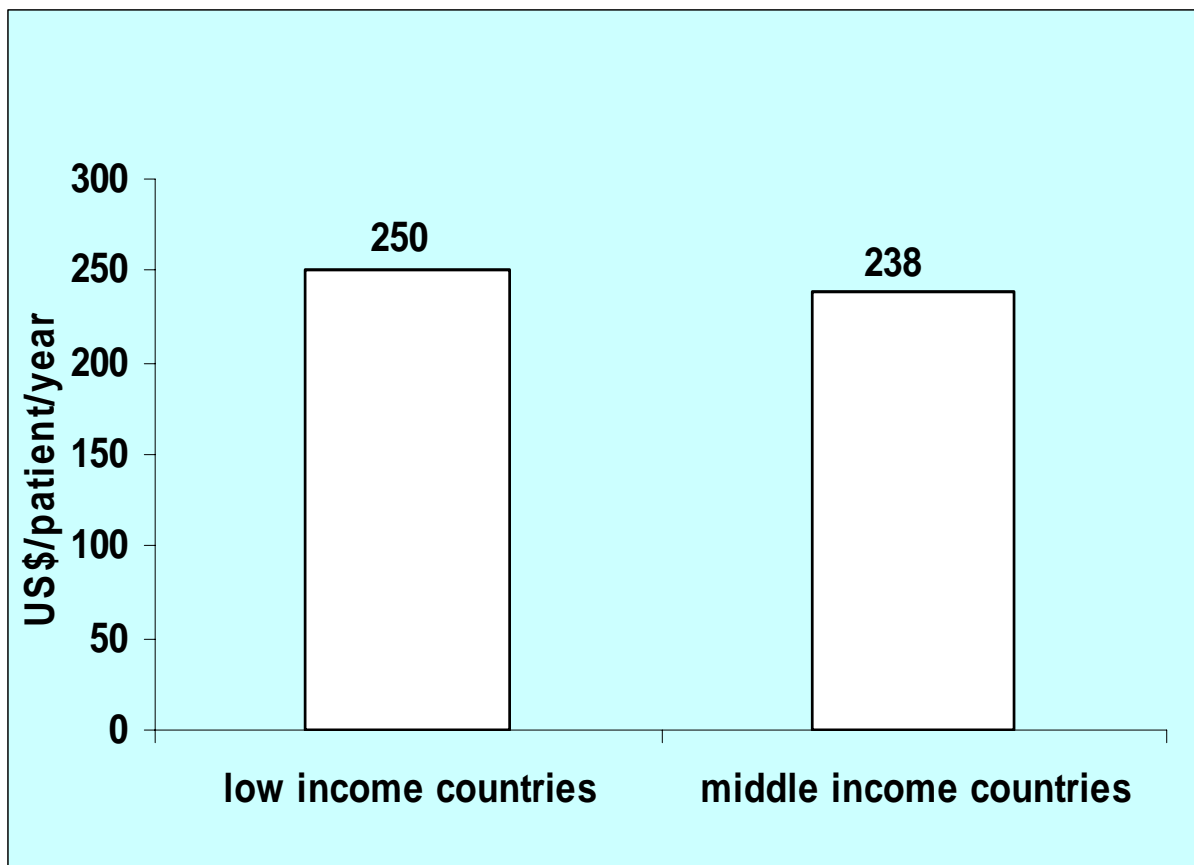

Weighted average price paid for didanosine (ddl) 100 mg in 2005

Weighted average price paid for abacavir (ABC) 300 mg in 2005

Weighted average price paid for didanosine (ddl) 200 mg in 2005

This finding can be explained by the fact that low income countries heavily procured from Bristol-Myers Squibb. While middle income countries opted for cheaper generic versions

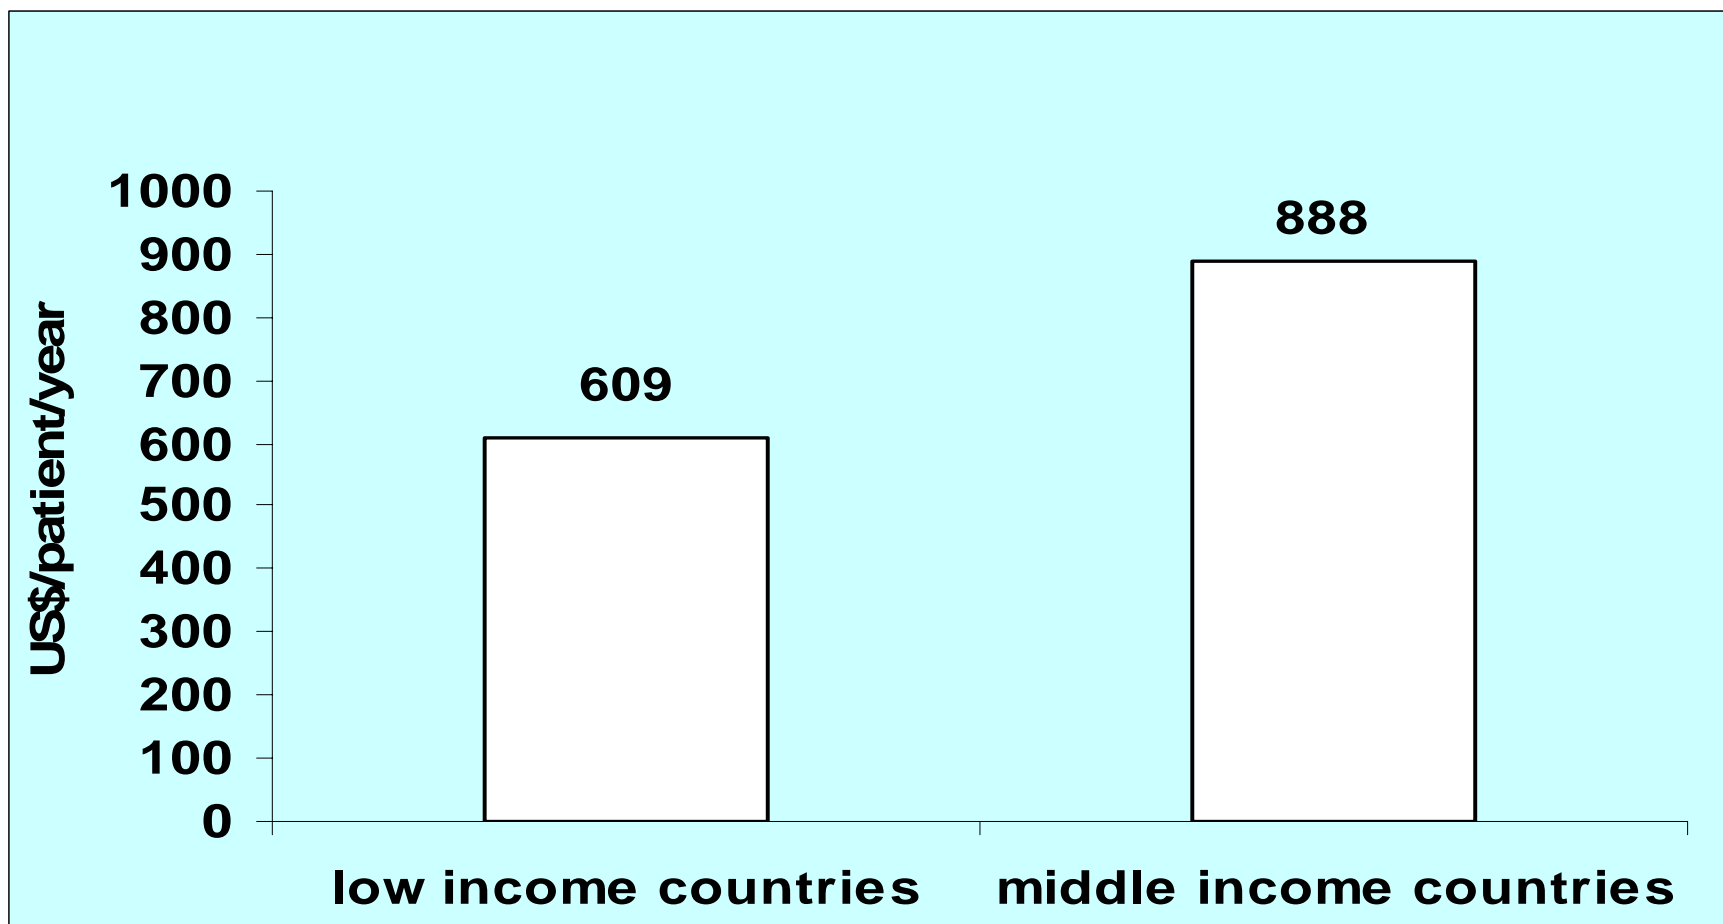

Weighted average price paid for saquinavir (SQV) 200 mg in 2005

Weighted average price paid for tenofovir (TDF) 300 mg in 2005

Weighted average price paid for indinavir (IDV) 400 mg in 2005

Weighted average price paid for ritonavir (RTV) 100 mg in 2005

Weighted average price paid for lopinavir/ritonavir (LPV/r) 133/33 mg in 2005
