Description:

1997: Legacy estimate.

1998: No accepted DTP1 data. Estimate based on DTP3 coverage of 89. Current estimate of 96 percent changed from previous revision value of 95 percent.

1999: No accepted DTP1 data. Estimate based on DTP3 coverage of 82. Current estimate of 93 percent changed from previous revision value of 95 percent.

2000: No accepted DTP1 data. Estimate based on DTP3 coverage of 99. Reported data of 105 percent greater than 100 percent. Current estimate of 99 percent changed from previous revision value of 98 percent.

2001: No accepted DTP1 data. Estimate based on DTP3 coverage of 99. Reported data of 105 percent greater than 100 percent. Current estimate of 99 percent changed from previous revision value of 98 percent.

2002: No accepted DTP1 data. Estimate based on DTP3 coverage of 94. Current estimate of 98 percent changed from previous revision value of 95 percent.

2003: No accepted DTP1 data. Estimate based on DTP3 coverage of 92. Current estimate of 97 percent changed from previous revision value of 95 percent.

2004: Reported data calibrated to 1997 and 2005 levels. Current estimate of 99 percent changed from previous revision value of 95 percent.

2005: Estimate based on reported data. Current estimate of 99 percent changed from previous revision value of 95 percent.

2006: Estimate based on reported data. Current estimate of 95 percent changed from previous revision value of 98 percent.

2007: No accepted DTP1 data. Estimate based on DTP3 coverage of 95. Reported data of 104 percent greater than 100 percent.

2008: Estimate based on reported data. Current estimate of 99 percent changed from previous revision value of 95 percent.

2009: Estimate based on reported data. Current estimate of 99 percent changed from previous revision value of 98 percent.

2010: No accepted DTP1 data. Estimate based on DTP3 coverage of 99. Reported data of 101 percent greater than 100 percent.

Bahamas

WHO/UNICEF Estimates of Protection at Birth (PAB) against tetanus

In countries where tetanus is recommended for girls and women coverage is usually reported as "TT2+", i.e. the proportion of (pregnant) women who have received their second or superior TT dose in a given year. TT2 + coverage, however, can under-represent the actual proportion of births that are protected against tetanus as it does not include women who have previously received protective doses, women who received one dose without documentation of previous doses, and women who received doses in TT (or Td) supplemental immunization activities (SIA). In addition, girls who have received DTP in their childhood and are entering childbearing age, may be protected with TT booster doses.

WHO and UNICEF have developed a model that takes into account the above scenarios, and calculates the proportion of births in a given year that can be considered as having been protected against tetanus - "Protection at Birth".

In this model, annual cohorts of women are followed from infancy through their life. A proportion receive DTP in infancy (estimated based on the WHO-UNICEF estimates of DTP3 coverage). In addition some of these women also receive TT through routine services when they are pregnant and may also receive TT during SIAs. The model also adjusts reported data, taking into account coverage patterns in other years, and/or results available through surveys. The duration of protection is then calculated, based on WHO estimates of the duration of protection by doses ever received. The proportion of births that are protected against tetanus as a result of maternal immunization reflects the tetanus immunization received by the mother throughout her life rather than simply the TT immunizations received during the current pregnancy.

Year	PAB coverage estimate (%)
1997	82
1998	83
1999	84
2000	85
2001	86
2002	87
2003	88
2004	89
2005	90
2006	92
2007	90
2008	90
2009	90
2010	90

¹ This model is described in: Griffiths U., Wolfson L., Quddus A., Younus M., Hafiz R.. Incremental cost-effectiveness of supplementary immunization activities to prevent neo-natal tetanus in Pakistan. Bulletin of the World Health Organization 2004; 82:643-651.
