SPECIFICATIONS

Temperature threshold	0°C
Accuracy of temperature threshold	0°C ± 0.3°C
External dimensions	50x30x10.5 mm.
External Material	ABS
Weight	0.012 kg
Number per package	450 pcs

COMMENTS

Test report: Force Technology reference No. m1460-194692, (March 2003)

Meets WHO/UNICEF Standard E6/IN.3

Function: An irreversible temperature indicator that shows if a product, such as vaccine has been exposed to freezing temperatures. It consists of an electronic temperature measuring circuit with associated LCD-display. If the indicator is exposed to a temperature below 0°C ± 0.3°C for more then 60min ± 3min the display will change from the "good" status into the "alarm" status. A small blinking dot in the bottom right hand corner of the LCD display indicates that the device is functioning.

Use: The indicator is used to warn of freezing and is packed with DPT and its combinations, TT as well as with Hepatitis B and other freeze sensitive vaccine. Shelf life is 5 years.
