INTRODUCTION

The Information Resource Centre of the WHO Communicable Diseases cluster (CDS) houses in one location all the information materials produced by CDS departments, in order to facilitate access by WHO's partners and the research community. This sixth issue of *CDS information resources* brings together details of all materials published by CDS from January 2001 to May 2002. The Centre does, of course, have many earlier documents and other sources of information on infectious diseases including the previous issues of *CDS information resources*. Please contact us at the address given on the inside front cover for any materials you seek.

Entries are organized alphabetically by broad subject (disease or activity), and list the most recent materials first. The reference number is given for each entry and its availability in various languages is indicated where appropriate. **The documents shown in colour are those which have become available since the previous catalogue was issued.**

Electronic copies

The full texts of many CDS documents are currently available online through the WHO web site. The address on the inside front cover gives access to current and previous issues of this catalogue and of the CDS newsletter *Action against infection*. Addresses of other specific sites are listed on the inside back cover. These sites also provide relevant information about infectious diseases and WHO activities in that area.

How to request printed copies

Requests should be sent to the CDS Information Resource Centre at the address given on the inside front cover.

Each request should state clearly:

- ▶ the title of the information material
- ▶ the reference number
- ▶ the language
- ▶ the complete mailing address, fax/email address and telephone number of the recipient.

Additional information

The CDS Information Resource Centre maintains a mailing list for infectious diseases. If you would like to be included, please send your name and mailing address and indicate your specific areas of interest.
