## INTRODUCTION

This tenth issue of *CDS information resources* produced by the Information Resource Centre brings together details of materials published on communicable diseases from January 2003 to June 2004. The Centre does, of course, have many earlier documents and other sources of information on infectious diseases including the previous issues of *CDS information resources*. Please contact us at the address given on the inside front cover for any materials you seek.

Entries are organized alphabetically by broad subject (disease or activity), and list the most recent materials first. The reference number is given for each entry and its availability in various languages is indicated where appropriate. *The documents shown in colour are those which have become available since the previous catalogue was issued.*

### *Electronic copies*

The full texts of many documents are currently available online through the WHO web site. The address on the inside front cover gives access to current and previous issues of this catalogue and of the newsletter *Action against infection*. Addresses of other specific sites are listed on the inside back cover. These sites also provide relevant information about infectious diseases and WHO activities in that area.

### *How to request printed copies*

Requests should be sent to the Information Resource Centre at the address given on the inside front cover.

Each request should state clearly:

- the title of the information material,
- the reference number,
- the language,
- the complete mailing address, fax/e-mail address and telephone number of the recipient.

### *Additional information*

The Information Resource Centre maintains a mailing list for infectious diseases. If you would like to be included, please send your name and mailing address and indicate your specific areas of interest.
