First consultation* on

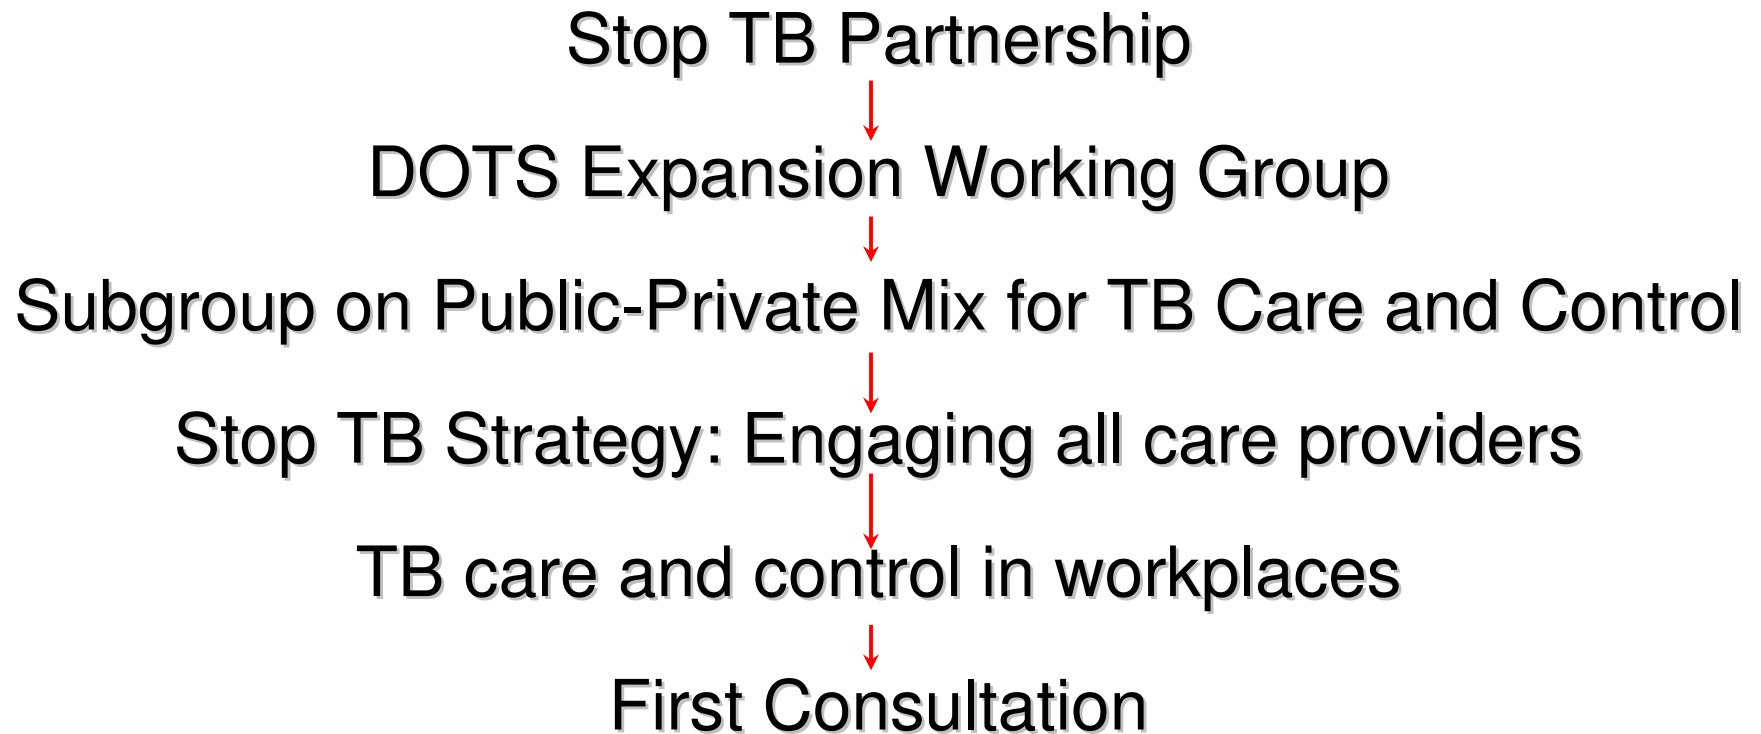

Engaging Workplaces in TB Care and Control

Background, Objectives and Agenda

Mukund Uplekar

***Supported by USAID-funded
Tuberculosis Control Assistance Program (TBCAP)**

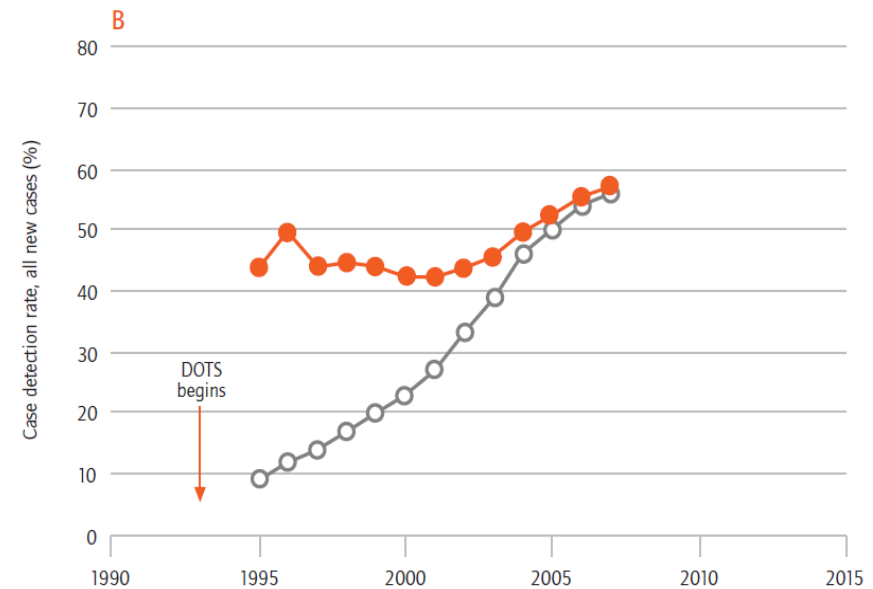

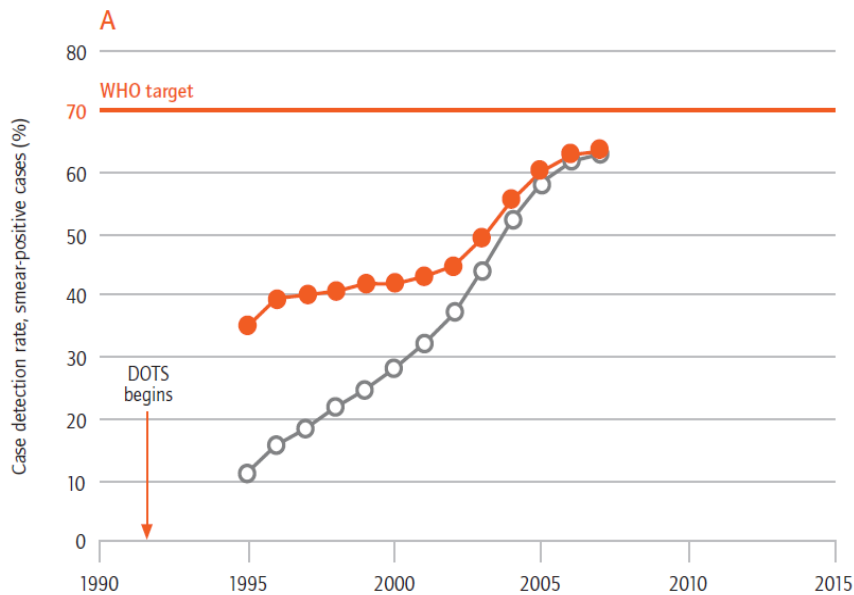

Background

Background

■ **FIGURE 1.19**

Progress towards the 70% case detection target. (a) Open circles mark the number of new smear-positive cases notified under DOTS 1995–2007, expressed as a percentage of estimated new cases in each year. Closed circles show the total number of smear-positive cases notified (DOTS and non-DOTS) as a percentage of estimated cases. (b) As (a), but for all new cases (excluding relapses).

Background

- 2003 WHO/ILO guidelines
- TB encompasses TB, HIV/TB and M/XDR-TB
- Focus on scaling up workplace TB programmes
- Introducing TB component in ongoing workplace HIV programmes

Objectives

- Review ongoing experiences of workplace engagement in TB care and control
- Discuss the roles of key stakeholders
- Discuss and further develop draft guidance framework
- Discuss ways to advocate workplace TB programmes

Expected outcomes

- A review of and perspectives on workplace TB programmes
- Feedback on draft guidance framework
- Beginning of an action-oriented, country-focused, collaborative programme on workplace TB control

Agenda

-
- Present evidence-base and a draft guidance framework
 - Discuss working models and country experiences on workplace TB programmes
 - Understand perspectives of business coalitions, employer organizations and trade unions
 - Group work
 - Next steps
