9. Additional comments [Help](#)

Please provide any relevant information not covered elsewhere that you feel is important.

Would have like sustained WHO support to carry us through implementation

10. Questionnaire feedback

- (a) Please provide feedback for improvement of the Group 1 questionnaire. [Help](#)

The reporting format is very difficult. There is no a way to delete mistakes in the age groups for instance.

There is no place for us to report "other use of tobacco" for youth. Smoking is not our primary concern, rather, it is chewing betelnut with tobacco (either cigarette or smokeless) and there doesn't seem to be a way to report this.

No place to add references and comments to describe the data within this template.

The wording in many questions seems a little unclear and the template is not easy to interpret.

The document seems to freeze almost each time I try to work with it and "Word" shuts down.

(b) Please provide input for the future development of the Group 2 questionnaire.
