

Rolling Revision of the WHO Guidelines for Drinking-Water Quality

Draft for review and comments

(Not for citation)

**Chemical safety of drinking-water:
assessing priorities for risk management**

World Health Organization

July 2004

Contents

Part A Assessing and managing priorities.....	6
1 Introduction.....	7
1.1 The need for guidance on assessing priorities for risk management	7
1.2 Objective.....	7
1.3 Background.....	8
1.4 Administrative and policy context.....	8
1.5 How to use this publication.....	10
1.6 References.....	12
2 General principles and basis for prioritizing chemicals.....	13
2.1 Principles for assigning priorities for risk management	13
2.2 Setting priorities with limited information	14
2.3 Factors affecting chemical concentrations along pathways.....	15
2.3.1 Mixing and dilution.....	15
2.3.2 Volatilization.....	15
2.3.3 Adsorption.....	15
2.3.4 Chemical environment.....	15
2.3.5 Biological degradation.....	16
2.3.6 Groundwater vulnerability.....	16
2.4 Frequent priorities for risk management.....	16
2.4.1 Arsenic, fluoride and selenium	16
2.4.2 Nitrate	16
2.4.3 Iron and manganese	17
2.4.4 Lead.....	17
2.5 Reference	17
3 Developing and implementing risk management strategies	18
3.1 Identifying priority chemicals in a drinking-water supply	18
3.2 Drinking-water standards and guidelines.....	19
3.3 Overview of management procedures	19
3.3.1 Health-based targets.....	20
3.3.2 System assessment.....	22

3.3.3	Operational monitoring.....	22
3.3.4	Management procedures	23
3.3.5	Surveillance.....	23
3.4	References.....	23
Part B Identifying specific chemicals		24
4	Naturally occurring chemicals.....	25
4.1	General.....	25
4.1.1	Approach to dealing with naturally occurring chemicals	25
4.1.2	Aesthetic effects.....	25
4.1.3	Common health hazards.....	26
4.2	Environmental factors affecting inorganic constituents in water	26
4.3	Data sources	29
4.4	Indicator parameters and simple tests.....	29
4.5	Guidance on selecting relevant chemicals	29
4.5.1	Catchment information	30
4.5.2	Acidity and potential acidity.....	30
4.5.3	Algal toxins.....	30
4.6	References.....	31
5	Chemicals from agricultural activities.....	32
5.1	Introduction.....	32
5.2	Data sources.....	32
5.3	Use of human excrement, animal manure, inorganic fertilizer and biosolids	33
5.3.1	Human excrement and animal manure	33
5.3.2	Chemical fertilizers.....	33
5.3.3	Biosolids	33
5.3.4	Nitrate levels	34
5.4	Intensive animal practices.....	35
5.5	Use of pesticides	36
5.5.1	Pathways of contamination.....	36
5.6	Irrigation and drainage.....	37
5.7	References.....	38

6	Chemicals from human settlements	39
6.1	Introduction.....	39
6.2	Data sources	41
6.3	Sewage systems and on-site sanitation	41
6.4	Waste disposal	42
6.5	Urban runoff.....	43
	6.5.1 General considerations.....	43
	6.5.2 Pathways of contamination by urban runoff.....	44
6.6	Fuel storage sites.....	44
6.7	Chlorinated solvents.....	45
6.8	Public health and vector control	45
6.9	Reference	46
7	Chemicals from industrial activities.....	47
7.1	Introduction.....	47
7.2	Data sources	47
7.3	Extractive industries.....	48
	7.3.1 Extractive industry activities.....	48
	7.3.2 Effects of mining on water quality.....	49
	7.3.3 Risk factor checklist.....	50
7.4	Manufacturing and processing industries	51
	7.4.1 Initial indicators	51
	7.4.2 Developing an inventory.....	51
	7.4.3 Assessing the impact.....	52
	7.4.4 Site inspection.....	52
	7.4.5 Risk factor checklist.....	53
	7.4.6 Pathway considerations.....	54
7.5	Reference	54
8	Chemicals from water treatment and distribution	55
8.1	Introduction.....	55
8.2	Chemicals used in treatment	55
	8.2.1 Disinfectants and disinfection by-products.....	55
	8.2.2 Coagulants.....	57

8.3	Other chemicals and materials used in water treatment.....	57
8.4	Distribution systems.....	58
8.5	Reference	60
Part C Appendices		61
Appendix 1: Potential sources and uses of chemicals considered in the WHO <i>Guidelines for Drinking-water Quality</i>		62
Appendix 2: Chemicals potentially discharged through effluents from industrial sources.....		80
Appendix 3: Association of pesticides with crops and crop types		86
Appendix 4: Practical comments on selected parameters.....		91
