

**ROLLING REVISION OF
THE WHO GUIDELINES FOR DRINKING-WATER QUALITY
Document title: Nickel in Drinking-water**

Please respond as far as possible to the following questions and wherever possible provide references to information you cite.

Send by e-mail to gdwqnickel@who.int before 30 May 2007

Please note that comments will not be posted to the public web site. The details given on the form will not be voluntarily shared or sold to any outside company and will only be used for verification and to identify postings, as described above. Please note that WHO reserves the right to contact participants in case comments require further clarification. By submitting ideas and comments in response to this questionnaire, you agree to abide by the instructions and accept the terms to which such submissions are subject in all respects.

Overall

Does this text respond to an issue of concern? :

Does this text compete or complement other publications in the area - if so which?

Is the level of guidance and information provided appropriate?

Are there major omissions that should be corrected?

Is there superfluous information that could be omitted?

Are there errors of fact or interpretation that should be corrected - if so what?
